

YOU BRIGHTEN OUR LIVES WITH YOUR SHINING LIGHT

INTERNATIONAL NURSES DAY - 12 MAY 2022

This International Nurses Day, we shine a light on our brave and faithful nurses, acknowledging their tireless efforts in caring for our country's people - especially during the COVID-19 pandemic. We honour their defining role in healthcare and extend our profound gratitude for what they do so diligently every day.

Most of us can relate to Brené Brown's special reflection: 'When I think about the most miraculous moments of my life, and the most difficult, a nurse was standing next to me, often holding my hand.'

As we also celebrate Florence Nightingale's birthday, we remember 'The Lady with the Lamp' shining her light and tending to wounded soldiers at night. Light is a visible symbol of life, hope and warmth. We applaud you for your choice to be a shining light in our healthcare services.

You brighten our lives with your shining light.
